

**International Skeletal Dysplasia Registry
Instructions for Submission of Radiographic Cases**

- 1. CD containing Complete Skeletal Survey (Required)**
 - X-rays detailing the following are requested:
 - Skull (AP & lateral)
 - Spine: cervical (lateral), thoracic (AP and lateral) and lumbar (AP and lateral)
 - Pelvis and hips (AP)
 - Chest (AP rib technique)
 - Hands and wrists (AP)
 - Long bones (AP)
 - Knees (Lateral)
 - Feet and ankles (AP and lateral)
 - For a newborn or small baby, AP and lateral films of the whole body are usually sufficient if the above sites are adequately shown. If not, please take separate AP and lateral films of the skull and AP of both hands.
 - Please make sure CD contains the date the images were taken
 - Please make sure images are in JPG format

- 2. Medical Records (Required)**- Including most recent detailed physical examination, most recent genetics consultation report, genetic testing results and other relevant lab results. If the patient is deceased, we would also like to obtain the autopsy report when it becomes available.

- 3. Demographic Information Sheet (Required)**- To be completed by genetic counselor or referring provider. Blank form is located under the [Forms](#) tab on our website.

- 4. Clinical photographs (if available)**
