CT Scans for Dental Implants

UCLA Radiology can provide your practice with an imaging package for dental implant patients that offers paraxial and panoramic views produced by our new high-speed 64-slice Multi-Detector Computed Tomography (CT) system to assist in pre- and post-implant planning. This procedure also is available on our Sensation 16 system. The imaging study is performed under the direction of Dr. Kambiz Motamedi, musculoskeletal radiologist.

*The imaging package is being offered at a cost of \$417
to be paid at the time of service, and includes:*

- The CT study of the maxilla and/or mandible regions without contrast
- Study report
- CD of the complete study and printed film(s) of significant images

To provide the smoothest experience for your patients, we request that you fax your order for the CT study to (310) 301-6835. Please provide the following patient information:

- Full Name
- Date of Birth
- Address
- Contact Number

To schedule an appointment, call (310) 301-6800.

Thank you for your interest in UCLA Radiology. We look forward to exceeding your imaging expectations.
